Subject Index

A

Abscisic acid
  effect on maize root K^+ channels, 145
  level changes, effects on *Lemna NPR1* gene, 1299
  mapping intercellular carbon dioxide mole fraction, in *Rosa rubigonosa* leaves, 947
Abscission cells, functional, bean, transdifferentiation of mature cortical cells, 891
Acer pseudoplatanus (*see* Sycamore)
Achnanthes longipes, adhesive stalks of, fucoglucuronogalactans within, 1431
Acidic ribosomal protein, synthesis and phosphorylation of, in maize, 379
Actin
  bundling protein, pollen tubes of lilly, 1421
  depolymerization, stress-induced translational activity and, potato tuber tissue, 1227
  in soybean cell, kinase and phosphatase regulation of, 279
Actin microfilaments, rearrangement of, plant root hairs responding to *Rhizobium etli*, 871
Acyl-coenzyme A synthetase, fatty acid elongation and, in *Brassica napus* and leek, 251
N-Acylethanolamines, formation and molecular composition, 1163
S-Adenosylmethionine decarboxylase, morning glory encoding of, light regulation of, 867
Adhesive stalks, of *Achnanthes longipes*, fucoglucuronogalactans within, 1431
ADP-glucose pyrophosphorylase, in tomato fruit, 101
ADP-ribosylation factor, Japanese willow encoding of, 446
Agave deserti, phloem transport of fructans in, 709
Air-grown cells, of *Synechococcus* UTEX 625, bicarbonate and carbon dioxide transport in, 1125
Aldehyde oxidase, in auxin-overproducing *Arabidopsis* mutant, 687
Aleurone protoplast, of barley, gibberellic acid response in, calcium-dependent protein phosphorylation and, 765
Alfalfa
  aquaporin homolog encoding in, 869
  ENOD40 gene expression in, nodulation factor and cytokinin induction of, 53
  root nodule of
    antioxidants in, 37
    genomic sequence of Nmh7, 1604
    infected, Nms-22 gene specific for, 446
  root of, *Rhizobium meliloti* respiratory elicitors and, 777
Algae
  chlorophyte,
    3-dimethylsulfoniopropionate biosynthesis in, 369
  phylogeny of, 9
  small subunit rRNA from, 1604
  unicellular, induced β-carotene synthesis driven by triacylglycerol deposition, 1239
Alkaloid, *Catharanthus roseus* accumulation of, 853
Allium porrum (*see* Leek)
Aluminum
  maize root sensitivity to, 155
  oxidative stress and, in *Arabidopsis thaliana*, 409
  tobacco cell calcium and, 81
Amaranthus edulis, photosynthesis by, oxygen requirement and inhibition of, 823
1-Aminocyclopropane-1-carboxylate synthase gene, response of to pollination signals, in orchid flowers, 419
Amyloplast stroma, of maize, polypeptides in, 1451
Anabaena azollae, *S*-formylglutathione hydrolase encoding in, 868
Angiosperm, parasitic, host communication with, 1
Anion channel(s), in Arabidopsis seedlings, blue light and, 503
Anoxia
  regulation of sugar-sensitive sucrose synthases, maize, 1573
  wheat seedling antioxidant defense system activation after, 651
Anthocyanin
  accumulation, in Arabidopsis seedlings, blue light and, 503
  light-induced accumulation, reduction in inoculated sorghum mesocotyls, 979
Antioxidant defense system, in wheat seedling, after hypoxia/anoxia, 651
Antioxidant(s)
  in legume root nodule, 37
  in tobacco, response to tetrapyrrole-induced oxidative stress by, 107
Apoplasmic invertase inhibitor, in tobacco, 733
Apoplastic sugars and enzymes, in oat, cold hardening and, 403
Aquaporin homolog, alfalfa encoding of, 869
Arabidopsis thaliana
  5′-adenylylsulfate reductase encoding in, 869
  alpha homolog encoding in, 868
  auxin-overproducing mutant of, aldehyde oxidase activity in, 687
  Coi1 mutant of, coronatine, methyl jasmonate, and wounding in, 1037
  cyclic nucleotide-regulated ion channels from, 1604
  embryo-defective mutant, disrupted in biotin synthesis, 935
  ethylene mutants of, mechanical stimulation and, 643
  GA2 locus of, *ent*-kaurene synthase of giberellin biosynthesis, 1271
  glutathione peroxidase protein from, 1193
  glycine decarboxylase/serine hydroxymethyltransferase system in, sulfanilamide and methotrexate effects on, 137
  hypocotyl elongation in, auxin transport and, 455
  LON protein encoding in, 868
  Nia1 and *Nia2* gene, differential expression, 1091
  nuclear tRNA cysteine gene in, 446
  nucleoside diphosphate kinase 2 from, cloning, 1604
  oxidative stress in, aluminum-induced, 409
  petal development in, plastid ontogeny during, 797
  phytochrome A and B, phototransduction kinetic differences, 1533
  primary root of, gravitropism of, cap cells and, 213
  reversible glycosylated polypeptide-1, cloning and characterization of, 1339
  root growth in, cell division and elongation effects, 1515
  Rubisco in
    CO_2 effects on, 715
    pea small subunit protein in, carbamylation and, 695
  seedling of, anion channels and anthocyanin accumulation in, blue light and, 503
  two-fingered C2H2 zinc-finger protein from, 1193
Arginase, soybean seedling encoding of, 867
Ascorbate peroxidase, in legume root nodule, 37
Aspartate aminotransferase, cDNA clone, isolation and DNA sequence analysis, 1191
Aspergillus niger pectin lyase B, three-dimensional structure of, 69
ATP sulfurylase, overexpression, bright yellow 2 tobacco cells, 1307
Auxin-overproducing *Arabidopsis thaliana* mutant, aldehyde oxidase activity in, 687
Auxin transport
  Arabidopsis hypocotyl elongation and, 455
  light effects, cucumber seedlings, 1505
  in tobacco cell suspension, 833
Avena sativa (*see* Oat)
Azide-sensitive factor, in thylakoid transport of photosynthetic oxygen-evolving complex, 805

B

Banana, fruit of, 1-aminocyclopropane-1-carboxylic acid synthase from, 1192
Barley
  aleurone protoplast of, gibberellic acid response in, calcium-dependent protein phosphorylation and, 765
  novel isoform of chloroplast-coupling factor a-subunit in, 703
  photoinhibition of, at chilling temperatures, 755
  root of, iron deficiency in, formate dehydrogenase and, 725
Bean (*see also* Broad bean; French bean; Mung bean; Soybean)

cDNA, encoding Rubisco activase, 1192
functional abscission cells in, transdifferentiation of mature cortical cells, 891
leaf vein of, virus accumulation in, 125
root hairs, rearrangement of actin microfilaments in, *Rhizobium etli*, 871
root nodule of, antioxidants in, 37
Beet (*see* Sugar beet)
Benzenoid esters, in *Clarkia breweri* floral scent production, 599
Benzoic acid, co-permeability of water and, across cuticles, 117
Beta vulgaris (*see* Sugar beet)
Bicarbonate, transport, air-grown cells of *Synechococcus* UTEX 625, 1125
Biotin, synthesis, embryo-defective mutant of *Arabidopsis thaliana* disrupted during, 935
Birdsfoot trefoil, transgenic, genetic manipulation of condensed tannins, 1133
Blue light, anion channels and anthocyanin accumulation and, in Arabidopsis seedling, 503
Brassica juncea (*see* Mustard)
Brassica napus, acyl-coenzyme A synthetase in, fatty acid elongation and, 251
Broad bean, transport phloem of, sieve element/companion cell complex symplasmic constriction in, 271

C

Ca^{2+}-ATPase, from radish seedling plasma membrane, 845
Cadmium
binding, uptake, and translocation, intact seedlings of wheat cultivars, 1413
fluxes, microelectrode for measurement in *Thalspi* sp. and wheat roots, 1393
Calcium
in tobacco cell, aluminum and, 81
in tobacco seedling, heat shock and, 429
Calcium-dependent protein phosphorylation
and barley aleurone protoplast gibberellic acid response, 765
of *Vicia faba* potassium channel, 785
CAP160, spinach, expression of two spinach cold-acclimation proteins in tobacco, 1367
Carbon dioxide
intercellular, mapping mole fraction in *Rosa rubiginosa* leaves, 947
transport, air-grown cells of *Synechococcus* UTEX 625, 1125
uptake, in microalgae cells and cloroplasts, 193
Carbonic anhydrase, in *Chlamydomonas reinhardtii* mitochondria, 637
Carnation, petal senescence in, ethylene receptor and, 867
β-Carotene, synthesis, driven by triacylglycerol deposition, unicellular alga, 1239
Carrot
cell of, polyamine metabolism in, 299
dihydrolate reductase-thymidylate synthase gene from, 1603
glucose-starved, phospholipid catabolism in, 223
somatic embryos of, novel globulin-like protein gene from, 1603
Cassava
elongation of factor-1-alpha gene from, 1603
roots of, cyanogenesis in, 1219
Casuarina glauca, nodules of, acyl carrier protein from, 1605
Catalase
hydrogen peroxide and, parallel changes during thermotolerance, mustard seedlings, 1351
level, photosynthesis and, in transgenic tobacco, 259, 870
Catharanthus roseus, alkaloid accumulation by, 853
Cell cycle, spatial and temporal analysis of, sunflower leaves, 991
Cell elongation, normal cortical microtubule alignment and, cellulose synthesis, 1043
Cell membrane, of tobacco, homogalacturonan-methyltransferase in, 337
Cellulose, synthesis, normal cortical microtubule alignment and elongating of cells, 1043
Cell walls, biosynthesis, reversibly autoglycosylated arabidopsis protein implicated in, 1339
Cherry, fruit-related metallothionein-like cDNA clone from, 867
Chickpea, proteinase inhibitors in, podborer gut proteinase inactivation of, 393
Chilling temperatures
barley photoinhibition at, 755
maize leaf photosynthesis and, 571
Chlamydomonas reinhardtii
cells and chloroplasts of, HCO_3^- and CO_2 uptake in, 193
mitochondria of, carbonic anhydrase in, 637
ribulose-1,5-bisphosphate carboxylase/oxygenase, intracellular localization of, 1585
Chlorophyll fluoresccence imaging, in *Rosa rubigonosa* leaf, fed with abcisic acid, 947
Chlorophyte algae, 3-dimethylsulfoniopropionate biosynthesis in, 369
Chloroplast
of microalgae, HCO_3^- and CO_2 uptake in, 193
small heat-shock protein oligomer, heat stress effects, 1151
of tomato, heat shock protein from, as protection of photosystem II in heat stress, 439
of *Wollastonia biflora*, 3-dimethylsulfoniopropionate and *S*-methylmethionine accumulation in, salinity and, 165
Chloroplast ATPase, γ-subunit of, chloroplast protein import effects on accumulation of, 1179
Chloroplast-coupling factor, a-subunit of, novel isoform of, 703
Chloroplast protein, effects on accumulation of γ-subunit of chloroplast ATPase, transit peptide mutations, 1179
Chlororespiration, nonphotochemical reduction of plastoquinone pool, sunflower leaves, 1209
Choline monooxygenase, osmotic stress and, in sugar beet and spinach, 859
Cicer arietinum (*see* Chickpea)
cDNA sequence CanSMT3 from, 1605
nonspecific lipid-transfer protein from, isolation, 1191
Cinnamyl alcohol dehydrogenase, *Eucalyptus globulus* cDNA clone encoding, nucleotide sequence, 1191
Circadian rhythm
of ethylene production, phytochrome B and, 17
of *PNZIP* regulation, phytochrome and, 27
Clarkia breweri, flower of, scent production in, 599
Clover
root nodule of, antioxidants in, 37
white, mutant of, defective in nodule root development, 913
Coi1 mutant, arabidopsis, novel gene in response to coronatine, methyl jasmonate, and wounding, 1037
Cold hardening, apoplastic oat sugars and enzymes and, 403
Coleoptile(s), of maize, hydrogen-ATPase and hydrogen-pyrophosphatase reversibility in, 1487
Communication, between plants, 1
Copper-inducible promoter, controlled cytokinin production with, transgenic tobacco, 969
Corn (*see* Maize)
Coronatine, novel gene in response to, differential expression, 1037
Cortical cells, mature, transdifferentiation to functional abscission cells, bean, 891
Cotton
delta-cadinene synthase gene, induced by bacterial infection, 1192
fibers of, osmoregulation during turgor-driven cell expansion, 1539
3-hydroxy-3-methylglutaryl coenzyme A reductase encoding in, 869
4-Coumarate:coenzyme A ligase, in poplar hybrid, 743
C_4 plant, photosynthesis by, oxygen requirement and inhibition of, 823
Crassulacean acid metabolism species (*see also specific plant*, e.g. *Agave desert*)
phloem transport of fructans in, 709
Cucumber
floral buds, 1-aminocyclopropane-1-carboxylate oxidases from, 1192
phloem fluids of, salicylic acid and 4-hydroxybenzoid acid accumulation in, 231
seedlings of, light effects on auxin transport, 1505
Cucumis sativa (*see* Cucumber)
Cucurbita maxima (*see* Squash)
Cucurbita pepo (*see* Pumpkin)
Cuticles, co-permeability of water and organic acids across, 117
Cu/Zn superoxide dismutase
ice plant encoding of, 868
mustard encoding of, 867
Cyanide, production, hydroxynitrile lyase in production, cassava root, 1219
Cyanobacteria (*see also specific plant*, e.g. *Anabaena azollae*)
ferredoxin I cloning from, 869
S-formylglutathione hydrolase encoding in, 868

HCO_3^- transport in, 183
lacking iron superoxide dismutase, sensitivity to oxidative stress, 1593
photosystem I cloning from, 868
unicellular, photosystem II cyclic heterogeneity and photoactivation in, 1551
Cyanothece sp., ATCC 51142, photosystem II cylic heterogeneity and photoactivation in, 1551
Cysteine, nuclear tRNA of, in *Arabidopsis thaliana*, 446
Cytochrome P450 (*see also* NADPH:cytochrome P450 reductase)
Cytokinin
controlled production, use of copper-inducible promoter, in transgenic tobacco, 969
ENOD40 gene induction by, in alfalfa, 53
nitrate reductase activity induce by, *Nia1* and *Nia2* genes, 1091
tobacco leaf senescence and, 329
Cytoplasm, of tobacco, calcium, aluminum and, 81
Cytosine-5-methyltransferase, tomato coding in, 446

D

Daucus carota (*see* Carrot)
Dehydrin transcripts, accumulation of, sunflower drought tolerance and, 319
Desiccation, tolerance, protein secondary structure changes and, maize embryos, 1169
Dianthus caryophyllus (*see* Carnation)
Dichloroacetamides, herbicide safener-binding protein, maize, 1083
2,4-Dichlorophenoxyacetic acid, co-permeability of water and, across cuticles, 117
3-Dimethylsulfoniopropionate
accumulation in *Wollastonia biflora* chloroplasts, salinity and, 165
biosynthesis of, in chlorophyte alga, 369
Diterpene synthase gene, transcriptional control of, response to wounding, grand fir, 1497
DNA-binding protein, in pea mitochondria, 519
Drought stress, nonspecific lipid transfer protein gene family responsive to, tomato, 1461
Drought tolerance (*see also* Water deficit)
in sunflower, dehydrin transcript accumulation and, 319
Dunaliella bardawil, unicellular alga, induced β-carotene synthesis driven by triacylglycerol deposition, 1239
Dunaliella tertiolecta, cells and chloroplasts of, HCO_3^- and CO_2 uptake in, 193

E

Echinochloa colonum, homoserine fate in, 547
Egeria densa, leaf of, sulfhydryl blocker effects in, fusicoccin and, 681
Eggplant, somatic embryogenesis in, cellular polyamine content and, 617
Embryogenesis, in eggplant, cellular polyamine content and, 617
Endo-β-1,4-glucanase, pine, rapidly growing reproductive structures and, 959
Endosperm
of maize, zein storage proteins in starch granules from, 1563
of rice, cytoskeleton-bound prolamine in, 559
ENOD40 gene, nodulation factor and cytokinin induction of, in alfalfa, 53
Epicuticular wax, accumulation, during leaf development, leeks, 901
Erwinia chrysamthemi pectin lyase C, three-dimensional structure of, 69
Ethylene
phospholipid catabolism mediated by, in glucose-starved carrot, 223
regulation of polygalacturonase mRNA accumulation, in tomato fruit, 1145
Ethylene mutants, of *Arabidopsis thaliana*, mechanical stimulation and, 643
Ethylene production, circadian, phytochrome B and, in sorghum, 17
Ethylene receptor, petal senescence and, in carnation, 867
n-Ethylmaleimide, oxygen uptake induced by, fusicoccin and, in *Egeria densa* leaf, 681
Eucalyptus globulus, nucleotide sequence of, 1191
Euphorbia esula (*see* Leafy spurge)
Evolution, of algae, 9

F

Fabaceae, leaf vein of, virus accumulation in, 125
Fatty acid
elongation activities, during leaf development, leeks, 901
elongation, acyl-coenzyme A synthetase and, in *Brassica napus* and leek, 251
Ferredoxin:thioredoxin reductase precursor, soybean encoding of, 446
Fiber(s), of cotton, osmoregulation during turgor-driven cell expansion, 1539
Flaveria anomala, glycine cleavage system in
H protein of, 445
P protein of, 445
T protein of, 446
Flaveria pringlei
glycine cleavage system in, H protein of, 445
serine hydroxymethyltransferase from, 1603
Flaveria trinervia
GDCSPA and GDCSPB genes of, P protein coded by, 445
glycine cleavage system in, T protein of, 446
Flower
of *Clarkia breweri*, scent production in, 599
of orchid, 1-aminocyclopropane-1-carboxylate synthase gene response to pollination signal in, 419
of *Pharbitis nil*, clock-regulated transcript during, 1479
of sorghum, photoperiod control of gibberellin levels and, 1003
Formate dehydrogenase
in barley root iron deficiency, 725
in potato leaf mitochondria, stress induction and, 627
French bean, cells, oxidative burst produced by, comparative biochemistry, 1379
Fruit
metallothionein-like cDNA clone related to, in cherry, 867
of pea, growth of, apical shoot hormonal control of, 511
of tomato
ADP-glucose pyrophosphorylase location in, 101
1-(malonylamino)cyclopropane-1-carboxylic acid in, 1527
Fucoglucuronogalactans, within adhesive stalks, *Achnanthes longipes*, 1431
Fusicoccin
binding to radish plasma membrane by, H^+-ATPase and, 529
Egeria densa leaf oxygen uptake and, 681

G

Galactose, basic glycoprotein rich in, in tobacco, 477
GA2 mutant, *Arabidopsis thaliana*, *ent*-kaurene synthase of giberellin biosynthesis, 1271
GDCSH gene, of *Flaveria anomala*, H protein coded by, 445
GDCSP genes, of *Flaveria trinervia*, P protein coded by, 445
Gibberellic acid response, of barley aleurone protoplast, calcium-dependent protein phosphorylation and, 765
Gibberellin
biosynthesis, *ent*-kaurene synthase of, *Arabidopsis thaliana*, 1271
levels, flowering and, photoperiod control of, sorghum, 1003
Ginkgo biloba, cuticle of, co-permeability of water and organic acids across, 117
Glycoprotein(s), hydroxyproline-rich, soybean root growth and, 671
Glucose starvation, of carrot, phospholipid catabolism in, 223
β-Glucosidase, structure and expression, from sorghum, 1469
Glycine cleavage system
H protein of
in *Flaveria anomala*, 445
in *Flaveria pringlei*, 445
P protein of
in *Flaveria anomala*, 445
in *Solanum tuberosum*, 445
T protein of
in *Flaveria anomala*, 446
in *Flaveria trinervia*, 446
Glycine decarboxylase, metabolism of, in Arabidopsis, 137
Glycine max (*see* Soybean)
Glycolate oxidase, peroxisome import of, in pumpkin, 309
Glycoprotein(s), galactose-rich basic, in tobacco, 477
Gossypium hirsutum (*see* Cotton)
Grand fir, regulation of oleoresinosis, 1497
Gravitropism
of *Arabidopsis* primary root, cap cells and, 213
in tobacco hypocotyl, 495
Guard cell, calcium-dependent protein kinase in, phosphorylation of *Vicia faba* potassium channel by, 785

H

HCO_3^- transport, in cyanobacteria, 183
HCO_3^- uptake, in microalgae cells and chloroplasts, 193
Heat shock, intracellular Ca^{2+}, and thermotolerance induced by, in tobacco seedling, 429
Heat-shock cognate, 81-kilodalton amyloplast stromal, starch-biosynthetic enzymes and, 1451
Heat-shock protein
  chloroplast small oligomer, heat stress effects, 1151
  methionine-rich chloroplast, as protection of photosystem II in heat stress, 439
Heat stress (*see also* Thermotolerance)
  effects on chloroplast small heat-shock protein oligomer, 1151
  photosystem II in, chloroplast heat-shock protein as protection during, 439
  response of maize mitochondria, 1097
Helianthus annuus (*see* Sunflower)
Herbicide safeners, binding protein, maize, 1083
Homogalacturonan-methyltransferase, in tobacco cell membrane, 337
Homoserine, in higher plant cells, 547
Hordeum vulgare (*see* Barley)
H protein, of glycine cleavage system
  in *Flaveria anomala*, 445
  in *Flaveria pringlei*, 445
Hydrogen-ATPase
  fusicoccin and, in radish plasma membrane, 529
  hydrogen-pyrophosphatase and, reversibility, maize coleoptiles and seeds, 1487
Hydrogen peroxide, catalase and, parallel changes during thermotolerance, mustard seedlings, 1351
Hydrogen-pyrophosphatase
  hydrogen-ATPase and, reversibility, maize coleoptiles and seeds, 1487
  vacuolar, in mung bean hypocotyl, 589
4-Hydroxybenzoid acid, accumulation of, in cucumber phloem fluids, 231
3-Hydroxy-3-methylglutaryl coenzyme A reductase, cotton encoding of, 869
Hydroxynitrile lyase, role in root cyanide production, cassava, 1219
Hydroxyproline, glycoprotein rich in, soybean root growth and, 671
Hydroxypyrubate reductase, NADH-dependent, tobacco leaf senescence and, 329
Hymenaea courbaril, seeds, xyloglucan derived from, signaling molecule, 1013
Hypocotyl
  of Arabidopsis, elongation of, auxin transport and, 455
  of tobacco, gravitropism in, 495
Hypoosmotic stress, in tobacco cell suspension, 659
Hypoxia
  in maize root tips, respiration, biosynthesis and intracellular pH during, malate effects, 1073
  $^{13}NH_4^+$ flux and, in rice root, 581
  potato leaf mitochondrial formate dehydrogenase and, 627
  regulation of sugar-sensitive sucrose synthases, maize, 1573
  wheat seedling antioxidant defense system activation after, 651

I

Ice plant, Cu/Zn superoxide dismutase encoding in, 868
Inflorescences, female, of maize, proline-rich proteins in, 485
Inositol tetrakisphosphate kinase, in soybean seed, 291
Inositol trisphosphate kinase, in soybean seed, 291
Insect cells, heterologous expression of SKT1 in, 879
Ipomoea nil (*see* Morning glory)
Iron deficiency
  in barley root, formate dehydrogenase and, 725
  stress response, role in stimulating heavy-metal transport in plants, 1063
Iron superoxide dismutase, cyanobacterium lacking in, oxidative stress effects, 1593
Isoprene synthase, stromal and thyalkoid-bound isoforms of, in willow leaves, 1111

J

Japanese willow
  ADP-ribosylation factor encoding in, 446
  yeast translation initiation factor Sui1 encoding in, 446

K

ent-Kaurene synthase, of gibberellin biosynthesis, *GA2* locus of *Arabidopsis thaliana*, 1271
Kernel, of maize, proline-rich proteins in, 485
Kinase(s), soybean cellular actin regulation by, 279
Krebs cycle, contribution, biologic processes, maize root tips, 1073

L

Leaf
  of *Arabidopsis thaliana*, Rubisco in, CO_2 effects on, 715
  of *Egeria densa*, sulfhydryl blocker effects in, fusicoccin and, 681
  of leeks, epicuticular wax accumulation and fatty acid elongation activities during development, 901
  of maize
    chilling stress and, 571
    mesophyll cells in, assimilated sulfur from bundle sheath to, 1315
  of pea, magnesium chelatase in, 605
  of potato
    mitochondrial formate dehydrogenase in, stress induction of, 627
    phosphoinositide-specific phospholipase C isoforms in, 239
  of *Rosa rubigonosa*, mapping intercellular carbon dioxide mole fraction in, 947
  of spinach
    plasma membranes, redox enzymes of, 1029
    reconstituted system of peroxisomes and mitochondria from, 1333
  of sunflower
    nonphotochemical reduction of plastoquinone pool, 1209
    spatial and temporal analyses of expansion and cell cycle in, 991
  of tobacco, pyruvate kinase lacking in, 45
  of willow, isoprene synthase, stromal and thylakoid-bound isoforms of, 1111
Leaf senescence, in tobacco, regulation of by cytokinin, sugars, and light, 329
Leaf vein(s)
  of bean, virus accumulation in, 125
  of pea, virus accumulation in, 125
Leafy spurge, intron-encoded maturase-like gene, 1193
Leek
  acyl-coenzyme A synthetase in, fatty acid elongation and, 251
  leaves of, epicuticular wax accumulation and fatty acid elongation activities during development, 901
Leghemoglobin
  heme moiety of, root nodules, 1259
  yellow lupine gene coding for, 867
Legume(s), root nodules of, antioxidants in, 37
Lemna gibba NPR1 gene, phytochrome response of, abscisic acid level change effects, 1299
Light
  anthocyanin accumulation induced by, inoculated sorghum mesocotyls, 979
  Arabidopsis hypocotyl elongation and, auxin transport and, 455
  blue, anion channels and anthocyanin accumulation and, in Arabidopsis seedling, 503
  dim red, polar auxin transport and, cucumber seedlings, 1505
  morning glory *S*-adenosylmethionine decarboxylase regulation by, 867
  tobacco hypocotyl gravitropism and, 495
  tobacco leaf senescence and, 329
Light stress, potato leaf mitochondrial formate dehydrogenase and, 627
Lilly, pollen tubes of, actin-bundling protein isolated from, 1421
Lipid-transfer protein, nonspecific, isolation from *Cicer arietinum*, 1191
Lipid-transfer protein genes, nonspecific, three drought-responsive members, tomato, 1461
Lipoxygenase, soybean, localization to subcellular compartments, source-sink status and, 923
Lipoxygenase-1, soybean, oxidation of 3*Z*-nonenal, 1359
Lotus corniculatus (*see* Birdsfoot trefoil)
  aspartate aminotransferase DNA clone from, isolation, 1191
Lupine, yellow, leghemoglobin encoding in, 867
Lupinus luteus, genes *Ypr10.1a* and *Ypr10.1b*, pathogenesis-related proteins of PR10 class, 1192
Lycopersicon esculentum (*see* Tomato)
Lycopersicon peruvianum (*see* Tomato, wild)

Lythrum salicaria, transport phloem of, sieve element/companion cell complex symplasmic constriction in, 271

M

Maackia amurensis, nodules of
14–3–3 brain protein homolog from, 1604
ENOD2 cDNA clone from, 1604
Magnesium chelatase, in pea leaf, 605
Maize
acidic ribosomal proteins in, synthesis and phosphorylation of, 379
amyloplast stroma of, polypeptides in, 1451
coleoptiles and seeds of, hydrogen-ATPase and hydrogen-pyrophosphatase reversibility in, 1487
developing embryos, desiccation tolerance, changes in protein secondary structure and, 1169
endosperm of, starch granules, zein storage proteins in, 1563
female inflorescences and kernels of, proline-rich proteins in, 485
herbicide safener-binding protein of, 1083
leaf of
chilling stress and, 571
mesophyll cells in, assimilated sulfur from bundle sheath to, 1315
mitochondria, heat-stress response of, 1097
mitochondrial pyruvate dehydrogenase complex, partial purification of, 1443
novel isoform of chloroplast-coupling factor a-subunit in, 703
root of
aluminum sensitivity of, 155
K^+ channels in, water stress and abscisic acid regulation of, 145
sucrose synthase role for anoxic tolerance, 1323
root tips of, hypoxia, respiration, biosynthesis and intracellular pH during, malate effects, 1073
sugar-sensitive sucrose synthases, regulation by hypoxia and anoxia, 1573
ubiquitin-conjugating enzyme from, mitotically active tissue, 1191
Malic enzyme, contribution, biologic processes, maize root tips, 1073
1-(Malonylamino)cyclopropane-1-carboxylic acid, as major conjugate of aminocyclopropane-1-carboxylic acid, tomato fruit, 1527
Manihot esculenta (*see* Cassava)
Mastigocladus laminosus, thermophilic cyanobacterium, molecular cloning, 1192
Mastigocladus laminosus
ferredoxin I cloning from, 869
photosystem I cloning from, 868
Medicago sativa (*see* Alfalfa)
Mesembryanthemum crystallinum (*see* Ice plant)
Mesocotyls, inoculated sorghum, anthocyanin accumulation induced by light, 979
Mesophyll cells, assimilated sulfur from bundle sheath, maize leaves, 1315
Metallothionein-like cDNA clone, fruit-related, in cherry, 867
Metals, heavy, transport, role of iron-deficiency stress response in stimulation of, 1063
Methotrexate, glycine/serine metabolism and, in Arabidopsis, 137
Methyl jasmonate, novel gene in response to, differential expression, 1037
S-Methylmethionine, accumulation in *Wollastonia biflora* chloroplasts, salinity and, 165
Methyl salicylate, in pathogen-inoculated tobacco, 387
Methyl viologen, oxidative stress induced by, effects on cyanobacterium, 1593
Microalgae, cells and chloroplasts of, HCO_3^- and CO_2 uptake in, 193
Microspectroscopy, Fourier transform infrared, protein secondary structure changes, maize embryos, 1169
Microtubule/microfibril paradigm, extending of, 1043
Mitochondria
of *Chlamydomonas reinhardtii*, carbonic anhydrase in, 637
of pea, DNA-binding proteins of, 519
of potato, formate dehydrogenase in, stress induction of, 627
Monoterpene synthase gene, transcriptional control of, response to wounding, grand fir, 1497
Morning glory, *S*-adenosylmethionine decarboxylase encoding in, light regulation of, 867
Mortal, mutant of white clover, defective in nodal root development, 913
Mung bean
hypocotyl of, vacuolar H^+-pyrophosphatase in, 589
seedlings of, encoding V-type ATPase c subunits from, 1192
Mustard
Cu/Zn-superoxide dismutase encoding in, 867
full-length cDNA clone from
encoding expansin, 1605
encoding glyoxysomal fatty acid beta-oxidation, 1605
seedlings of, parallel changes in hydrogen peroxide and catalase during thermotolerance, 1351
Mycorrhizal
arbuscular fungi, intracellular pH of, 1279
root-fungus symbioses, regulation of, 1201

N

NADH-dependent hydroxypyrubate reductase, tobacco leaf senescence and, 329
NADH-monodehydroascrobate oxidoreductase, a redox enxyme, of spinach leaf plasma membranes, 1029
NADPH:cytochrome P450 reductase, isoforms of, in *Arabidopsis*, 357
1-Naphthylphtalamic acid, Arabidopsis hypocotyl elongation inhibition by, light and, 455
Nicotiana plumbaginifolia (*see* Tobacco)
Nicotiana tabacum (*see* Tobacco)
Nitrate reductase, activity, differential expression, 1091
Nms-22 gene, specific for infected alfalfa root nodule, 446
Nodulation factor, *ENOD40* gene induction by, in alfalfa, 53
Nodule (*see also* Root nodule)
3*Z*-Nonenal, lipoxygenase-1 oxidation, soybean, 1359
Norflurazon, oxidative stress induced by, effects on cyanobacterium, 1593
NPR1 gene, *Lemna NPR1* gene, phytochrome response, abscisic acid levels and, 1299
Nuclear genes, mutations, chloroplast-encoded large subunit of ribulose-1,5-bisphosphate carboxylase/oxygenase, 1387
Nucleotide sequence, *Eucalyptus globulus*, 1191
Nucleotide triphosphate(s), peroxisomal protein import and, in pumpkin, 309

O

Oat
apoplastic sugars and enzymes in, cold hardening and, 403
novel isoform of chloroplast-coupling factor a-subunit in, 703
serine/threonine kinase encoding in, 869
Oleoresinosis, regulation, grand fir, 1497
Oligogalacturonides, reducing-end-derivatized, in tobacco tissue cultures, 1289
Orchid, flower of, 1-aminocyclopropane-1-carboxylate synthase gene response to pollination signal in, 419
Ornithine decarboxylase, in transgenic carrot cell, polyamine metabolism and, 299
Oryza sativa (*see* Rice)
Osmoregulation, during turgor-driven cell expansion, developing cotton fibers, 1539
Osmotic stress, choline monooxygenase expression and, in sugar beet and spinach, 859
Oxalate oxidase/germin-like proteins, rice encoding of, 868
Oxidative burst
comparative biochemistry, rose and french bean cells, 1379
in tobacco cell suspension, 659
Oxidative stress
aluminum induction of, in *Arabidopsis thaliana*, 409
cyanobacterium sensitivity to, lack of iron superoxide dismutase and, 1593
defense against (*see* Antioxidants)
in pea plant, water deficit or paraquat induction of, 173
tetrapyrrole-induced, tobacco response to, 107
Oxygen
activated, role of peroxisomes in senescence, 1195
C_4 plant photosynthesis and, 823
uptake of, by *Egeria densa* leaf, fusicoccin and, 681
Oxygen stress (*see also* Anoxia; Hypoxia)

P

Papaya, fruit of, 1-aminocyclopropane-1-carboxylic acid synthase from, 1193
Paraquat, oxidative damage and, in pea plants, 173
Parasitic angiosperm, host communication with, 1
Pea
  fruit of, growth of, apical shoot hormonal control of, 511
  leaf of, magnesium chelatase in, 605
  leaf vein of, virus accumulation in, 125
  mitochondria of, DNA-binding proteins of, 519
  novel isoform of chloroplast-coupling factor a-subunit in, 703
  oxidative damage in, induced by water deficit or paraquat, 173
  root nodule of, antioxidants in, 37
  seedlings of, heavy-metal transport, role of iron-deficiency stress response in stimulation of, 1063
  small subunit protein of, in *Arabidopsis thaliana* Rubisco, 695
Pectin lyase B, three-dimensional structure of, 69
Pectin methyltransferase, in tobacco cell membrane, 337
Peroxisomes
  activated oxygen role of, in senescence, 1195
  membrane, of pumpkin, glycolate oxidase transport across, nucleotide triphosphates and, 309
  reconstituted system of, spinach leaves, 1333
Petal
  development of, in Arabidopsis, plastid ontogeny during, 797
  senescence of, ethylene receptor and, in carnation, 867
Petiole, of cucumber, phenylalanine ammonia lyase in, before phloem fluid accumulation of salicylic acid and 4-hydroxybenzoid acid, 231
pH, intracellular, arbuscular mycorrhizal fungi, 1279
Phalaenopsis spp. (*see* Orchid)
Pharbitis nil
  flower-inductive darkness, accumulation of clock-regulated transcript during, 1479
  PNZIP encoding of, phytochrome and circadian rhythm of, 27
Phaseolus vulgaris (*see* Bean)
Phenylalanine ammonia lyase, before salicylic acid and 4-hydroxybenzoid acid accumulation, in cucumber phloem fluids, 231
Phloem fluid, of cucumber, salicylic acid and 4-hydroxybenzoid acid accumulation in, 231
Phosphatase(s), soybean cellular actin regulation by, 279
Phospho*enol*pyruvate carboxylase
  contribution, biologic processes, maize root tips, 1073
  expression and localization, developing and germinating wheat grains, 1249
Phosphoinositide-specific phospholipase C, isoforms of, in potato leaf, 239
Phospholipase C, phosphoinositide-specific, in potato leaf, 239
Phospholipid catabolism, in glucose-starved carrot, 223
Phosphorus
  tomato phosphate transporter gene regulation by, 91
  uptake of, 447
Photoinhibition
  of barley, at chilling temperatures, 755
  heterogeneity and, photosystem II studied with thermoluminescence, 1053
Photoperiod
  control of gibberellin levels and flowering, sorghum, 1003
  induction of flowering, of *Pharbitis nil*, clock-regulated transcript during, 1479
Photorespiration, mitochondrial metabolism in, spinach leaves, 1333
Photosynthesis
  by C_4 plant, oxygen requirement and inhibition of, 823
  in maize leaf, chilling stress and, 571
  signals related to, regulation of *AK/HSD* gene expression, 1023
  in transgenic tobacco, catalase level and, 259, 870
Photosynthetic oxygen-evolving complex, thylakoid transport of, azide-sensitive factor in, 805
Photosystem II
  cyclic heterogeneity, photoactivation and, *Cyanothece* sp. ATCC 51142, 1551
  in heat stress, chloroplast heat-shock protein as protection during, 439
  heterogeneity and photoinhibition of, studied with thermoluminescence, 1053
Phototransduction, phytochrome A and B differences in, *Arabidopsis thaliana*, 1533
Phototropism, oat serine/threonine kinase encoding and, 869
Phytochrome
  and circadian *PNZIP* regulation, 27
  different phototransduction kinetics, in *Arabidopsis thaliana*, 1533
Phytochrome B, circadian ethylene production and, in sorghum, 17
Pinus radiata, two endo-β-1,4-glucanases, rapidly growing reproductive structures and, 959
Pisum sativum (*see* Pea)
Plant Gene Register, 445, 867, 1191, 1603
Plasma membrane
  of radish, fusicoccin binding to, H^+-ATPase and, 529
  of radish seedling, purification of purification of Ca^{2+}-ATPase from, 845
Plastid ontogeny, during Arabidopsis petal development, 797
Plastoquinone pool, nonphotochemical reduction, sunflower leaves, chlororespiration and, 1209
PNZIP, circadian phytochrome regulation of, 27
Podborer gut proteinase, chickpea proteinase inhibitors inactivation by, 393
Pollen tube(s), of lilly, actin-bundling protein isolated from, 1421
Pollination signal, 1-aminocyclopropane-1-carboxylate synthase gene response to, in orchid flowers, 419
Polyamine, cellular, eggplant somatic embryogenesis and, 617
Polyamine metabolism, in transgenic carrot cells, 299
Polyethylene glycol, low water potential, root growth and oxygen relations, 1403
Polygalacturonase mRNA, regulation of accumulation by ethylene, in tomato fruit, 1145
Polypeptides, maize amyloplast stroma, 1451
Poplar hybrid, 4-coumarate:coenzyme A ligase in, 743
Potassium channel
  in maize root, water stress and abscisic acid regulation of, 145
  inwardly rectifying, heterologous expression in insect cells, 879
  of *Vicia faba*, guard cell calcium-dependent protein phosphorylation of, 785
Potato
  cysteine synthase isoforms from, 1604
  glycine cleavage system in, P protein of, 445
  inwardly rectifying potassium channel from, heterologous expression in insect cells, 879
  leaf of
    mitochondrial formate dehydrogenase in, stress induction of, 627
    phosphoinositide-specific phospholipase C isoforms in, 239
  tuber tissue, stress-induced translational activity of, actin depolymerization effects, 1227
Potyvirus, accumulation of, in pea and bean leaf veins, 125
P protein
  GDCSPA gene coding of, in *Flaveria trinervia*, 445
  of glycine cleavage system
    in *Flaveria anomala*, 445
    in *Solanum tuberosum*, 445
Prolamine, cytoskeleton-bound, in rice endosperm tissue protein bodies, 559
Proline, protein rich in, in female inflorescences and kernels of maize, 485
Proline catabolism, induction of osmotically regulated genes in rice by, 203
Prunus laurocerasus, cuticle of, copermeability of water and organic acids across, 117
Pumpkin, peroxisome membrane of, glycolate oxidase transport across, nucleotide triphosphates and, 309
Pyrenoid(s), *C. reinhardtii*, ribulose-1,5-bisphosphate carboxylase/oxygenase in, 1585
Pyrimidine, in tobacco, UMP synthase regulation by, 815
Pyruvate dehydrogenase complex, mitochondrial, maize, partial purification of, 1443
Pyruvate kinase
  absence of, in transgenic tobacco leaf, 45
  contribution, biologic processes, maize root tips, 1073

R

Radish
plasma membrane of, fusicoccin binding to, H^+-ATPase and, 529
seedling of, purification of plasma membrane Ca^{2+}-ATPase from, 845
Raphanus sativus (*see* Radish)
Redox enxymes, of spinach leaf plasma membranes, 1029
Respiratory elicitors, of *Rhizobium meliloti*, alfalfa roots and, 777
Rhizobium meliloti, respiratory elicitors from, alfalfa roots and, 777
Rhizobium teli, nodulation signals, actin microfilaments responding to, 871
Rhizosphere signaling, between parasites and hosts, 1
Ribulose-1,5-bisphosphate carboxylase/oxygenase
activation of, temperature and, 539
in *Arabidopsis thaliana*, pea small subunit protein in, carbamylation and, 695
in *Arabidopsis thaliana* leaf, CO_2 effects on, 715
Ribulose-1,5-bisphosphate carboxylase/oxygenase
chloroplast-encoded large subunit of, defect in expression, 1387
intracellular localization, *C. reinhardtii*, 1585
Rice
cDNA encoding translation elongation factor-1 alpha, 1604
endosperm tissue protein bodies of, cytoskeleton-bound prolamine in, 559
homeobox gene of, tobacco plant overexpression of, 471
osmotically regulated genes in, proline catabolism and, 203
oxalate oxidase/germin-like protein encoding in, 868
root of, $^{13}NH_4^+$ flux in, hypoxia and, 581
SEC14-like protein from, molecular cloning, 1192
Root-fungus symbioses, mycorrhizal, regulation of morphogenesis, 1201
Root hair, actin microfilaments in, responding to *Rhizobium etli* nodulation signals, 871
Root nodule
heme moiety of leghemoglobin in, plant host synthesizes, 1259
of alfalfa, infected, Nms-22 gene specific for, 446
of legumes, antioxidants in, 37
of soybean, UDP-glucose dehydrogenase in, 349
Root(s)
of alfalfa, *Rhizobium meliloti* respiratory elicitors and, 777
of Arabidopsis, gravitropism of, cap cells and, 213
of Arabidopsis thaliana, cell division and elongation effects on growth, 1515
of barley, iron deficiency in, formate dehydrogenase and, 725
of cassava, role of hydroxynitrile lyase in cyanide production, 1219
growth and oxygen relations, low water potential, 1403
of maize
aluminum sensitivity of, 155
K^+ channel in, water stress and abscisic acid regulation of, 145
sucrose synthase role for anoxic tolerance, 1323
of rice, $^{13}NH_4^+$ flux in, hypoxia and, 581
of soybean, hydroxyproline-rich glycoprotein gene and, 671
of Thalspi sp. and wheat, measurement of cadmium fluxes in, microelectrode for, 1393
of white clover, a mutant defective in nodal development, 913
Root tips, of maize, hypoxia, respiration, biosynthesis and intracellular pH during, malate effects, 1073
Rosa rubigonosa, leaves, mapping intercellular carbon dioxide mole fraction in, 947
Rose, cells, oxidative burst produced by, comparative biochemistry, 1379
Rubisco (*see* Ribulose-1,5-bisphosphate carboxylase/oxygenase)

S

Salicylic acid
accumulation of, in cucumber phloem fluids, 231
co-permeability of water and, across cuticles, 117
thermotolerance induced by, parallel changes in hydrogen peroxide and catalase during, 1351
Salinity, accumulation of 3-dimethylsulfoniopropionate and *S*-methylmethionine in *Wollastonia biflora* chloroplasts, 165
Salix bakko (*see* Japanese willow)
Salix discolor (*see* Willow)
Seedling(s)
of Arabidopsis, anion channels and anthocyanin accumulation in, blue light and, 503
of cucumber, light effects on auxin transport, 1505
of pea, heavy-metal transport, role of iron-deficiency stress response in stimulation of, 1063
of radish, purification of plasma membrane Ca^{2+}-ATPase from, 845
of soybean, axes arginase encoding in, 867
of tobacco, heat shock, intracellular Ca^{2+}, and thermotolerance in, 429
of wheat
antioxidant defense system activation in, after hypoxia/anoxia, 651
cadmium binding, uptake, and translocation, 1413
Seed(s)
of *Hymenaea courbaril*, xyloglucan derived from, signaling molecule, 1013
of maize
desiccation tolerance, changes in protein secondary structure and, 1169
hydrogen-ATPase and hydrogen-pyrophosphatase reversibility in, 1487
of soybean, inositol trisphosphate and tetrakisphosphate kinases in, 291
Senescence
activated oxygen role of peroxisomes in, 1195
of tobacco leaf, regulation of by cytokinin, sugars, and light, 329
Serine hydroxymethyltransferase, metabolism of, in Arabidopsis, 137
Serine/threonine kinase, oat encoding of, 869
Sesquiterpene synthase gene, transcriptional control of, response to wounding, grand fir, 1497
Shoot, apical, of pea, fruit growth and, 511
Sieve element/companion cell complex, symplasmic constriction of, in transport phloem, 271
SKT1, characterization of, heterologous expression in insect cells, 879
Solanaceae, leaf vein of, virus accumulation in, 125
Solanum melongena (*see* Eggplant)
Solanum tuberosum (*see* Potato)
Sorghum
circadian ethylene production in, phytochrome B and, 17
gibberellin levels and flowering in, photoperiod control of, 1003
inoculated mesocotyls, light-induced anthocyanin accumulation in, 979
Sorghum bicolor (*see* Sorghum)
Sorghum, β-glucosidase structure and expression from, 1469
Source-sink status, differential regulation, specific soybean lipoxygenase localization to discrete subcellular compartments, 923
Soybean
cellular actin network of, kinase and phosphatase regulation of, 279
ferredoxin:thioredoxin reductase precursor encoded in, 446
lipoxygenase-1, oxidation of 3Z-nonenal, 1359
novel isoform of chloroplast-coupling factor a-subunit in, 703
root nodule of
antioxidants in, 37
UDP-glucose dehydrogenase in, 349
root of, hydroxyproline-rich glycoprotein gene and, 671
seedling of, axes arginase encoding in, 867
seed of, inositol trisphosphate and tetrakisphosphate kinases in, 291
specific lipoxygenase, localization to subcellular compartments, source-sink status and, 923
Spinach
CAP160, expression of two cold-acclimation proteins and, in tobacco, 1367
choline monooxygenase expression in, osmotic stress and, 859
leaves of
reconstituted system of peroxisomes and mitochondria from, 1333
redox enzymes in, 1029
novel isoform of chloroplast-coupling factor a-subunit in, 703
Spinacia oleracea (*see* Spinach)
Squash, transport phloem of, sieve element/companion cell complex symplasmic constriction in, 271

Starch-biosynthetic enzymes, stromal localization of, maize, 1451
Starch deficiency, tobacco hypocotyl gravitropism and, 495
Starch granules, zein storage proteins, maize endosperm, 1563
Stem, of cucumber, phenylalanine ammonia lyase in, before phloem fluid accumulation of salicylic acid and 4-hydroxybenzoid acid, 231
Stress (*see also specific stressor,* e.g. Hypoosmotic stress)
  potato leaf mitochondrial formate dehydrogenase and, 627
Sucrose synthase
  role for anoxic tolerance, maize roots, 1323
  sugar-sensitive, hypoxia and anoxia, 1573
Sugar beet, choline monooxygenase expression in, osmotic stress and, 859
Sugar(s)
  apoplastic, in oat, cold hardening and, 403
  tobacco leaf senescence and, 329
Sulfanilamide, glycine/serine metabolism and, in Arabidopsis, 137
Sulfur, assimilated, from bundle-sheath to mesophyll cells, maize leaves, 1315
Sunflower
  dehydrin transcript accumulation in, drought tolerance and, 319
  leaves, spatial and temporal analyses of expansion and cell cycle in, 991
  leaves of, plastoquinone pool in, nonphotochemical regulation, 1209
Sycamore, homoserine fate in, 547
Synechococcus UTEX 625, air-grown cells of, bicarbonate and carbon dioxide transport in, 1125

T

Tannins, condensed, genetic manipulation, higher plants, 1133
Temperature, Rubisco activation and, 539
Thalspi sp., roots of, measurement of cadmium fluxes in, microelectrode for, 1393
Thermoluminescence, study of heterogeneity and photoinhibition, photosystem II, 1053
Thermotolerance (*see also* Chilling *entries;* Cold *entries;* Heat entries)
  changes in hydrogen peroxide and catalase during, mustard seedlings, 1351
  in tobacco seedling, heat shock and, 429
Thylakoid, transport of photosynthetic oxygen-evolving complex by, azide-sensitive factor in, 805
Tobacco
  apoplasmic invertase inhibitor in, 733
  bright yellow 2 cells, ATP sulfurylase overexpression effects, 1307
  cell membrane of, homogalacturonan-methyltransferase in, 337
  cell suspension of
    auxin carrier regulation in, 833
    oxidative burst and hypoosmotic stress in, 659
  cultured cells, ferredoxin-DADP$^+$ oxidoreductase cDNA from, 1192
  cytosolic calcium in, aluminum and, 81
  defense responses of, to tetrapyrrole-induced oxidative stress, 107
  elicitor-treated cells, *N*-acylethanolamine increase in, 1163
  expression of two spinach cold-acclimation proteins in, CAP160 and, 1367
  flavanone 3-hydroxylase, cloning and sequencing, 1605
  galactose-rich basic glycoprotein in, 477
  hypocotyl of, gravitropism in, 495
  leaf of, pyruvate kinase lacking in, 45
  leaf senescence in, regulation of by cytokinin, sugars, and light, 329
  overexpression of rice homeobox gene by, 471
  pathogen-inoculated, methyl salicylate in, 387
  photosynthesis in, catalase level and, 259, 870
  pyrimidine levels in, UMP synthase regulation by, 815
  seedling of, heat shock, intracellular Ca^{2+}, and thermotolerance in, 429
  tissue cultures, reducing-end-derivatized oligogalacturonides in, 1289
  transgenic, controlled cytokinin production in, 969
Tobamovirus, accumulation of, in pea and bean leaf veins, 125
Tomato
  cDNA encoding a 20S subunit from the proteasome, repressed by phosphate starvation, 1605
  cDNA from, encoding rubulose-1,5-bisphosphate carboxylase/oxygenase, 1603
  chloroplast of, heat shock protein from, as protection of photosystem II in heat stress, 439
  cysteine protease CYP1 from, full-length *C14* cDNA clone encoding for, 1193
  cytosine-5-methyltransferase encoding in, 446
  fruit of
    ADP-glucose pyrophosphorylase location in, 101
    1-(malonylamino)cyclopropane-1-carboxylic acid in, 1527
    regulation of polygalacturonase mRNA accumulation by ethylene, 1145
  nonspecific lipid-transfer protein gene family, three-drought-responsive members of, 1461
  phosphate transporter genes in, phosphorus regulation of, 91
  wild, self-incompatibility RNase structure in, 463
T protein, of glycine cleavage system
  in *Flaveria anomala,* 446
  in *Flaveria trinervia,* 446
Translational activity, stress-induced, actin depolymerization effects, potato tuber tissue, 1227
Triacylglycerol, deposition, unicellular alga *Dunaliella bardawil,* 1239
Trifolium pratense (*see* Clover)
Trifolium repens (*see* Clover, white)
Triticum aestivum (*see* Wheat)
Triticum turgidum (*see* Wheat)

U

Ubiquitin-conjugating enzyme, from maize, mitotically active tissue, 1191
UDP-glucose dehydrogenase, in soybean root nodule, 349
Uridine monophosphate synthase, regulation of, by tobacco pyrimidine level, 815

V

Vacuolar H^+-pyrophosphatase, in mung bean hypocotyl, 589
Vicia faba (*see* Broad bean)
  potassium channel of, guard cell calcium-dependent protein phosphorylation of, 785

W

Water, low potential, root growth and oxygen relations, 1403
Water deficit (*see also* Drought tolerance)
  effect on maize root K^+ channels, 145
  oxidative damage and, in pea plants, 173
Weed(s), homoserine fate in, 547
Wheat
  developing and germinating grains, phospho*enol*pyruvate carboxylase in, 1249
  novel isoform of chloroplast-coupling factor a-subunit in, 703
  roots of, measurement of cadmium fluxes in, microelectrode for, 1393
  seedling of, antioxidant defense system activation in, after hypoxia/anoxia, 651
  seedlings of, cadmium binding, uptake, and translocation, 1413
Willow, leaves of, isoprene synthase in, 1111
Wollastonia biflora, chloroplasts of, 3-dimethylsulfoniopropionate and *S*-methylmethionine accumulation in, salinity and, 165
Wound, oleoresinosis in response to, grand fir, 1497
Wounding, novel gene in response to, differential expression, 1037

X

Xyloglucan octasaccharide XXLgol, from *Hymenaea courbaril* seeds, acts as signaling molecule, 1013

Y

Yeast translation initiation factor Sul1, Japanese willow encoding of, 446
Yellow pine, ferritin and peroxidase genes, stress responsiveness, 1604

Z

Zea mays (*see* Maize)
Zinnia elegans, transport phloem of, sieve element/companion cell complex symplasmic constriction in, 271
ZmUBC7–1, ubiquitin-conjugating enzyme from maize, mitotically active tissue, 1191
